Brian McVerry, Ph.D. Co-Founder

Marina Del Rey | California | bmcverry@gmail.com

PROFILE

- Scientist, inventor, and entrepreneur with experience bringing new technology and business ideas to the finish line
- National Science Foundation GRFP Recipient and Finalist in the U.S. Patent and Trademark Office National Collegiate Inventor Competition
- Author of several high-profile academic publications and patents
- A strong leader who is comfortable in high pressure environments with a track record of rigorous execution

EMPLOYMENT HISTORY

June 2016 – Present

Chief Technology Officer, Co-Founder, Silq Technologies — Los Angeles, CA

- Conceived and developed the Silq Surface treatment technology for implanted medical devices from scratch
- Scaled both the technology and business from proof-of-concept to revenue generation
- Led investment presentations demonstrating technology, market opportunity, and business strategy
- Generated first revenue by targeting patient populations with the greatest complication rates
- Guided regulatory strategy to obtain FDA clearance for urethral, suprapubic, and nephrostomy devices with the Silq surface treatment to reduce patient complications
- Built relationships with physicians, nurses, patients, and KOLs – now who are all Silq technology champions
- Architect of several clinical studies to demonstrate improved clinical outcomes and patient QoL of devices treated with the Silq technology
- Garnered interest from leading long-term and short-term implant manufacturers to reduce complication for their devices; current business engagements ongoing with leading players in cochlear implants, breast implants, contact lenses, gastric balloons, medical grade silicone manufacturing, and lung biopsy devices
- Led business IP strategy and collaborated with legal for patents, licensing, and FTO
- Traveled internationally and domestically to set up and secure deals that anchor current supply chain

EDUCATION

Sept 2011 – June 2016

Chemistry, Ph.D. University of California, Los Angeles — Los Angeles, CA

- Patent: *A Universal Scalable and Cost-Effective Surface Modification for Anti-Fouling Polymeric Membranes* - Licensed to Silq Technologies Corp. (formerly Hydrophilix)
- Patent: *Non-flammable electrolyte for energy storage devices* - Licensed to Nanotech Energy
- Publication: **McVerry *et al.*** A Readily Scalable, Clinically Demonstrated, Antibiofouling Zwitterionic Surface Treatment for Implantable Medical Devices. *Adv. Mater.* 2022, 34, 2200254. Highlighted in ScienceDaily, MSN, World Medicine Foundation, American Association for the Advancement of Science, Healthcare in Europe, NBC Los Angeles. **Impact Factor: 32**
- Publication: **McVerry *et al.*** Next-Generation Asymmetric Membranes Using Thin-Film Liftoff. *Nano Lett.* 2019, 19, 8, 5036–5043. Highlighted on Phys.org. **Impact Factor: 12**
- Authored proposal that awarded National Science Foundation Sustainable Chemistry Grant: Funded $330k for 3 years
- Finalist in the National Collegiate Invention Competition - U.S. Patent Office, Alexandria, Virginia
- Recipient of the National Science Foundation Graduate Research Fellowship: Most prestigious national graduate fellowship program - 16% acceptance rate with over 12,000 Ph.D. program applicants
- Recipient of National Science Foundation IGERT Fellowship: Clean Energy for Green Industry
- Recipient of Inorganic Faculty Award, UCLA Chemistry and Biochemistry, 2016
- Leader in Sustainability, Anderson School of Management, UCLA
- GPA: 3.6/4.0

Sept 2007 – June 2011

B.S. Biochemistry and Molecular Biology, University of California, Santa Barbara — Santa Barbara, CA

- Major GPA: 3.5/4.0
- Dean's Honor Roll: Spring 2009, Fall 2009
