Calibration Quote

Customer Info. (SILQ TECHNOLOGIES LA)									
Requestor : ETHAN RAO / CHRIS TURNER					Sales Person: RAYMOND WILLIAMSON SR.				
Customer Name : SILQ TECHNOLOGIES CORPORATION					Quoted By: Caryl Jane Y. Ison				
Address : 607 CHARLES E YOUNG DR E , LOS ANGELES, CA, 90095					Quoted No: SIL-Q-093022-LA-CAR				
Telephone No. : 508-250-8424 /(310) 806-9202					Date Quoted : 9/30/22				
Email : ETHANR@SILQ.TECH					Subject : Calibration- Expedite				
					PO No. :				
					Terms : CREDIT CARD				

Manufacturer	Model	Serial	Asset ID	Description	Cycle	Type	Qty	Unit Price	Total
METTLER TOLEDO	AB54-S			ANALYTICAL BALANCE	12 Months	Accredited Calibration	1	USD 149.00	USD 149.00
				EXPEDITE FEE	12 Months	Expedite Fee	1	USD 74.50	USD 74.50

Total Quantity : 2
Total Line Items : 2

Sub-Total Cost : 223.50 USD

Quoted Total : 223.50 USD

Special Customer Instruction:

- 1) Please be sure to include a hard copy of your PO with your shipment. If you do not use a PO please include a signed quote. MPC also requires a payment method on file. Otherwise, delays will occur.
- 2) This quote is for Accredited Calibration to be performed in MPC facility.
- 3) Expedite turnaround time (T-A-T) is approximately 2-3 business days, after receipt of equipment and PO in MPC lab.
- 4) If you have special additions or extra equipment that we need in order to calibrate the unit, please include it in the package when you ship.

Calibration Quote

Customer Acknowledgement

Turn Around Time:

- Calibration Time Required: 5 to 7 working days unless otherwise specified.
- Turn-around time is assessed and based on the availability of standards and personnel to perform the calibration service.

Method Used:

- If no other calibration method is specified by the customer, MP will use manufacturer, military, internationally recognized industry standard (ASTM, NIST, OMIL, etc.), or MP locally developed calibration procedure will be utilized based on availability.

Statements of Pass or Fail Conformance:

The uncertainty of measurement will be taken into account when determining compliance with specification, as per ILAC-G8:03/2009. All measurements and test results guard banded to ensure the probability of false-accept does not exceed 2% in compliance with ANSI/NCSL Z540.3-2006.

The status of compliance with the acceptance criteria will be reported as:

PASS - Compliant with specification;

FAIL - Not compliant with specification.

FAIL² - The measured value is not within the acceptance limits. However, a portion of the expanded uncertainty of measurement at 95% is within the specified tolerance.

PASS² - The measured value is within acceptance limits. However, a portion of the expanded uncertainty of measurement at 95% exceeds the specified tolerance.

The expanded uncertainty of measurement is stated as the standard uncertainty of measurement multiplied by the coverage factor $k=2$, which for a normal distribution corresponds to a coverage probability of approximately 95%, unless otherwise stated. The calibration report to be issued is compliance with ISO/IEC 17025:2017 and ANSI/NCSL Z540.3-2006 Method 6-Guard Bands based on Test Uncertainty Ratio.

Calibration Interval:

- Customer to advise calibration intervals for equipment. MP will use Manufacturer's suggested interval or 12 months interval on calibrations done unless otherwise specified by customer.

Calibration Subcontracting:

- Calibration subcontracting will be completed by an MP Accredited Vendor or Supplier, if it is required.
- All subcontracted calibrations shall be approved in advance by Customer.

Limited Calibration:

- For units that are found to have a limited calibration, MP will advise customer regarding its condition.
- MPC will proceed with limited calibration upon receipt of customer approval.

Units Found Out of Tolerance or Defective:

For units that are found to be out of tolerance or defective, MP will notify customer regarding its condition. MP will proceed with failed calibration upon receipt of customer approval.

On-Site Calibration Service Notes (When Applicable):

- On-Site fee includes all travel, lodging, and transport of our standards to do the job.
- Customer to provide suitable calibration area that meets our environmental requirements to do the job.
- Customer should schedule the availability of their equipment for calibration as to not cause delay.

Equipment Adds or Reductions:

- Customer can add equipment during On-Site calibration services. This request must be done in writing and approved by the customer.
- Customer must agree to amend their current purchase order to include the additional equipment or issue a new PO for the additional equipment.
- Customer may reduce the agreed total order value by 5% without incurring any additional On-Site fee. More than 5% reduction of total order value may result in higher On-Site Fee.

Limited Liability:

- Micro Precision Calibration's liability here-under shall be limited to the repair, restoration, or replacement of equipment items to the condition in which were received by Micro Precision Calibration upon pickup and/or serviced at the Customers facility.
- In no event shall Micro Precision Calibration be liable for any special, indirect, incidental, consequential or liquidated, penal or any economic loss / damages of any character, including, but not limited to loss of the customers property lost profits or lost production, whether claimed by the customer or by third party, irrespective of whether claims or actions for such damages are based upon agreement, warranty, negligence, strict liability or otherwise.

Customer Approvals:

- A purchase order from the customer based on this quote is recognized as an approval for MP to do calibrations based on all the requirements that was discussed in this document.
- By signing the customer confirmation field of this quotation will be recognized also as an approval for MP to do calibrations based on all the requirements that will be discussed in this document and invoice the calibration cost base on the agreed payment terms above upon completion of the service.

Division Notes

Levels of calibrations certification available:

- Commercial Calibration (Traceable):

Calibration is performed with NIST traceable standards. Full data is only reported if instrument is found out of tolerance.

- Z540 Calibration (Traceable with Data):

Calibration is performed with NIST traceable standards in full compliance of ANSI Z540-1-1994. Full data is recorded and shown on the certificate.

- 17025 Accredited Calibration (Accredited):

Calibrations are performed in accordance with ISO/IEC 17025:2017 and within our scope of accreditation. Certificate of calibration includes full data reporting and uncertainty calculation with Accredited Logo. Accredited calibrations are a 10-15 working day turn time.

- Commercial Calibration and Z540 Calibration conform with ISO/IEC 17025:2017.
- Z540.3 Calibration (Accredited with Guard-Banding):

Calibration is performed with NIST traceability standards in full compliance with ANSI/NCSL Z540.3:2006. Accredited calibrations with Guard Banding are a 10-15 working day turn time.

Decision Rule: Statements of Pass or Fail Conformance

All measurements and test results guard banded to ensure the probability of false-accept does not exceed 2% in compliance with ANSI/NCSL Z540.3-2006.

The status of compliance with the acceptance criteria is reported as:

- PASS - Compliant with specification

• PASS² - The measured value is not within the acceptance limits. However, a portion of the expanded uncertainty of measurement at 95% exceeds the specified tolerance.

- FAIL² - The measured value is not within the acceptance and specified tolerance limits.

However, a portion of the expanded uncertainty of measurement at 95% is within the specified tolerance.

- FAIL - Not compliant with specification.

The expanded uncertainty of measurement is stated as the standard uncertainty of measurement multiplied by the coverage factor $k=2$, which for a normal distribution corresponds to a coverage probability of approximately 95%, unless otherwise stated.

This calibration report complies with ISO/IEC 17025:2017 and ANSI/NCSL Z540.3-2006, Method 6 - Guard Bands Based on Test Uncertainty Ratio.

Minimum Order Requirements:

- A minimum charge of \$55.00 shall be charged on all orders (not including freight).

Repairs:

• Instruments received by Micro Precision Calibration, Inc., for Calibration and found to be in need of repair, shall incur the calibration charge, in addition to applicable evaluation and/or repair charges.

Warranty:

• Micro Precision Calibration, Inc., will warranty the workmanship of calibration service for a period of 30 days. This warranty covers workmanship and does not guarantee future performance of the instrument, as a calibration is a performance evaluation at a specific point in time.

Freight, Handling, and Travel:

- Charges are estimated. Invoice shall reflect actual costs. Travel charges are portal-to-portal plus overnight accommodations (when applicable).

Quotation Validity:

- This quote valid for 30 days.

Shipping:

• Equipment may be shipped to the address at the top of this email, no "attention to" is necessary. Be sure to include a signed copy of your quote with your shipment, your quote number will act as your RMA number. Should your company use a purchase order system, please include your PO as well.

CUSTOMER CONFIRMATION : I hereby accept all the conditions discussed in this quotation and allowing Micro Precision Calibration Inc to proceed calibration of our instruments.
