

	DOCUMENT TITLE: Management Review Meeting Minutes	Revision: A
	DOCUMENT #: FM1-QM.SLQ018	Effective Date: 25Sep2020

Meeting Date / Time: 16 Mar 2026 9:00 AM PT

Timeframe under review: 01 Jan 2025 to 31 Dec 2025

Agenda Items: (check all that apply to this meeting)

- ☒ Review of minutes and action items from the previous meeting (required at each meeting)
- ☒ Review of Quality Policy
- ☒ Review of general quality goals and objectives
- ☒ Results, actions and status of internal audits, regulatory agency inspections and notified body audits
- ☒ Status of the Corrective and Preventive Action System
- ☒ Review of Product Complaints trends
- ☒ Review of Production Data including nonconformities
- ☒ Review of training system performance
- ☒ Review of Post Market Surveillance / Customer Feedback Data
- ☒ Review of reportings to regulatory authorities
- ☒ Review of statistical techniques (sampling plans)
- ☒ Review of supplier performance
- ☒ Changes that could affect the quality management system
- ☒ Recommendations for improvement
- ☒ New or revised regulatory requirements
- ☒ Review of Risk Management Activities
- ☒ Review of Design Control Activities
- ☒ Review of Resource Levels

Attendees:

	DOCUMENT TITLE: Management Review Meeting Minutes	Revision: A
	DOCUMENT #: FM1-QM.SLQ018	Effective Date: 25Sep2020

Discussion Topics and Minutes:

Topic: Review of minutes and action items from the previous meeting
Topic Minutes/Notes The management review team reviewed the 2024 Management Review Meeting Minutes. The meeting minutes are maintained Silq's QMS system. There were 6 action items from 2024: 3 action items have been completed. 1 action item was revised. 2 action items postponed until next receipt of M.SLQ001/production of C.SLQ001. No further action required.

Topic: Review of the Quality Policy
Topic Minutes/Notes The team reviewed the quality policy established in QM.SLQ027 Rev. D and QM.SLQ035 Rev C. The team decided to revise the company quality policy to more accurately reflect ongoing company activities. Revised Quality Policy: Excellent patient care is the focus of all SILQ activities. We endeavor to meet or exceed our customers' satisfaction and expectations in providing safe and effective surface treated medical devices of the highest quality and that meets all applicable regulatory requirements. Each SILQ employee is personally committed to achieving this goal and continually improving our ability to maintain customer focus by operating a highly effective quality system that meets the requirements of applicable global standards and regulatory requirements for medical devices. Action Item: Prepare Document Change Order regarding quality policy
Action Items 1. Action Item: Prepare Document Change Order regarding quality policy
Assigned to: Ethan Rao ☐ CAPA Required ☐ Opportunity for Improvement ☒ Simple Action

DOCUMENT TITLE:
Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Review of general quality goals and objectives

Topic Minutes/Notes

There were two quality objectives established previously to review.
The team reviewed the 2 quality objectives for 2025 involving product quality.

Existing Objective: Incoming quality

Current Goal: The lot acceptance rate of incoming materials used in finished product shall be greater than 80%.

Existing Objective: Finished Product Quality

Current Goal: The complaint rate of failed catheters shall be less than 5% of the overall distributed catheters.

The team agreed that the existing quality objectives are not sufficiently detailed and establish thresholds that are too lenient. The team agreed that three new objectives would be added and that the two existing objectives would be reviewed using historical data and revised to more accurately reflect quality operations.

New Objective Recommendation: Active Post-Market Surveillance

New Objective Recommendation: Dynamic Employee Training Program

New Objective Recommendation: Quarterly Execution of Quality Plan Objectives

Action Items: Assemble historical data regarding the existing Incoming Quality and Finished Product Quality objectives and subsequently propose revision to both objectives for review by the management team. Propose specific and quantifiable goals of an Active Post-Market Surveillance Program, Dynamic Employee Training Program, and Quarterly Execution of Quality Plan Objectives to be reviewed by the management team. Once management team is aligned on all revised quality objectives, a document change order will be prepared and executed.

Action Items

1. Action Item: Assemble historical data regarding the existing Incoming Quality and Finished Product Quality objectives. Propose revision to both objectives for review by the management team

Assigned to: Ethan Rao

- ☐ CAPA Required
☐ Opportunity for Improvement
☒ Simple Action

2. Action Item: Propose specific and quantifiable goals of an Active Post-Market Surveillance Program, Dynamic Employee Training Program, and Quarterly Execution of Quality Plan Objectives to be reviewed by the management team

	DOCUMENT TITLE: Management Review Meeting Minutes	Revision: A
	DOCUMENT #: FM1-QM.SLQ018	Effective Date: 25Sep2020

Assigned to: Chuck Greiner, Ethan Rao	☐ CAPA Required ☐ Opportunity for Improvement ☒ Simple Action
3. Action Item: Review and agree on revised Quality Objectives	
Assigned to: Management Team	☐ CAPA Required ☐ Opportunity for Improvement ☒ Simple Action
4. Action Item: Prepare Document Change Order regarding quality objectives	
Assigned to: Ethan Rao	☐ CAPA Required ☐ Opportunity for Improvement ☒ Simple Action

Topic: Results, actions and status of internal audits, regulatory agency inspections and notified body audits	
Topic Minutes/Notes	
The team reviewed summary of audits in 2025 which included 1 internal audit and 1 external FDA inspection. 1) The internal audit was performed by Dr. Christopher Devine on January 16th through 17th, 2025. The scope of the audit covered ISO 13485:2016 and 21 CFR Parts 803, 806 and 820. The audit was completed with 0 findings, 0 recommendations and 0 concerns. Reference audit report #24-01. 2) The external FDA inspection was performed October 14th-16th. The scope of the audit was a Level-2 Surveillance Inspection of Class II Medical Device Manufacturer. The audit was completed with 2 observations noted in FDA Inspection FEI: 3014650073 Form 483. Team discussed the upcoming 2025 audit schedule which included: - 2025 Internal Audit schedule Team agreed that a Supplier Audit of Class I supplier Pathway MedTech was appropriate to be performed in Q3, 2026.	
Action Items	
1. Action Item: Update 2026 Supplier Audit schedule to include on-site audit of Pathway MedTech in Q3, 2026	
Assigned to: Ethan Rao	☐ CAPA Required ☐ Opportunity for Improvement ☒ Simple Action

DOCUMENT TITLE:
Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Status of the Corrective and Preventive Action System

Topic Minutes/Notes

The team reviewed the CAPA system status. Zero CAPAs were initiated prior to 2025. Three CAPAs were initiated in 2025.

CAPA 2025-001: Initiated by Ethan Rao 30 July 2025

Cause: (PCF 2025001) "In 5 occasions over a period of 3 years, it was reported to Silq that the port allowing connection of the saline syringe to the catheter became unseated from the catheter when the syringe was being connected".

Preventative Action: 100% visual/dimensional inspection of the SLQ-211610SPT finished goods (Performed 17 Nov 2025).

Effectiveness Confirmation 17 Nov 2026: All product complaints regarding inspected devices to be monitored. CAPA will be closed if no reoccurrences of valve malfunction are observed.

CAPA 2025-002: Initiated by Ethan Rao 20 Oct 2025

Cause: (FEI: 3014650073 483 Form Observation 1) An MDR report was not submitted within 30 days of receiving or otherwise becoming aware of information that reasonably suggests that a marketed device has malfunctioned in two cases since January 2023 where patients were required to seek medical intervention. Specifically, these events were documented in PCF 2023001 and PCF 2023004.

Corrective Action: All product complaints were reviewed in detail to capture any additional issues that should have triggered an MDR. Events described in PCF 2023001 and PCF 2023004 were reported on 15 Dec 2025. Revised QM.SLQ022 Rev B (Silq's internal Medical Device Reporting procedure) to align Silq quality policy procedures with respect to the FDA definition of "Serious Injury".

Effectiveness Confirmation 01 Dec 2026: All product complaints to be evaluated 1 year from effective date of QM.SLQ022 Rev B (01 Dec 2025). CAPA will be closed if all events that meet reportability criteria have been reported appropriately.

CAPA 2025-003: Initiated by Ethan Rao 20 Oct 2025

Cause: (FEI: 3014650073 483 Form Observation 2) An unauthorized design change was implemented by a supplier of Silq's contract manufacturer. On November 6, 2024, contract manufacturer informed Silq via written correspondence that a supplier has "implemented an improved valve that ensures secure placement and prevents dislodgement." Silq proceeded to manufacture and distribute the devices without completing the required regulatory processes per "Design Control Program" (QM.SLQ004, Revision A, effective September 25, 2020).

Corrective Action: Design review of the check valve modification performed. Pathway personnel to update device drawings to reflect modification appropriately (Received 13 Mar 2026). Silq will subsequently document a letter-to-file and revise QM.SLQ004, QM.SLQ005, and QM.SLQ006 to mandate that any notification of supplier modification trigger a mandatory design review, risk assessment, and regulatory evaluation. All Silq employees who require training for Design Control will be retrained.

Effectiveness Confirmation 01 Jul 2026: Successful completion of employee retraining

No action required.

DOCUMENT TITLE:
Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Review of Product Complaints trends

Topic Minutes/Notes

Team reviewed 1 Complaint received in 2025.

PCF# 2025001

Complaint status: Closed

Complainant: Olusegun Adelaja, Lead Senior Clinical Research Coordinator

Location: Charlottesville, VA

Date reported: July 25th, 2025

Number of units: 2 (16Fr x 10mL)

Complaint description: The valve of two (2) ClearTract 16Fr catheters (Lot: SLQ-81040413231) malfunctioned resulting in the nurses being unable to inflate the balloon.

Patient injury: None

Reportability determination: Not a reportable complaint

Failure investigation: While the catheters were unable to be returned to Silq, there is high confidence the root cause is the same failure mode observed in June 2024 during investigation into PCF 2024003

Corrective action: CAPA 2025-001

Team reviewed historical trend of product complaints. While the most common cause of product complaints has been addressed (Valve Malfunction 38%), the significant decrease in the quantity of product complaints indicates that there is a gap in reporting as a result of the reduction in post-market clinical study activities. The team agreed that an Active Post Market Surveillance Procedure should be established.

Action Item: Establish Active Post Market Surveillance procedure. After the specific content and objective procedures are established and agreed upon by the management team, a CAPA will be opened to detail revisions to quality management procedures.

Action Items

1. Action Item: Establish Active Post Market Surveillance objectives and procedure

Assigned to: Chuck Greiner

- ☐ CAPA Required
☐ Opportunity for Improvement
☒ Simple Action

2. Action Item: Review and align on Active Post Market Surveillance objectives and procedure

Assigned to: Management Team

- ☐ CAPA Required

DOCUMENT TITLE:
Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Status of the Production Data including nonconformities

Topic Minutes/Notes

Team reviewed the build summary for finished devices and suspension.

- 3 lots of finished devices were manufactured in 2025. All lots were accepted
- SLQ-211610SPT: Lot SLQ-05012025 (1298 units were released)
- SLQ-211810SPT: Lot SLQ-01242025 (369 units were released), Lot SLQ-05022025 (3268 units were released)
- Two lots of C.SLQ001 Suspension were released. Lot 2502-01-1 (81.2kg) and Lot 2502-01-2 (165.0kg)

Reviewed the nonconformance summary

- Two NCRs were released by Silq/Pathway in 2025

Silq NCMR001: After initial production of C.SLQ001 Lot 2502-01-1, it was discovered that the concentration of polymer in C.SLQ001 was 8.55 g/L which is less than the targeted 10.0 g/L threshold. Since additional processing of the suspension can be expected in the future, the manufacturing procedure (MP-C.SLQ001) and traveler (TR-C.SLQ001) were revised to include appropriate steps to process the suspension further. Additionally, the quality control procedure (QC-C.SLQ001) and report template (TMPI-QC-C.SLQ001) were updated to include recording of the average suspension sample concentration level.

Pathway NCR 25-079 (Silq CAPA 2025-001)

Two lots of finished goods were suspected of containing devices where the check valve (Item no. 5) assembly fails to meet the specified acceptance criteria. Specifically, the total length from the sleeve to the end of the check valve may exceed 26mm, suggesting the check valve is not properly secured to the connector. The Sort-to-Accept and Sort-to-Scrap interim disposition was successfully executed on Lots SLQ-11202024 and SLQ-05012025 by qualified SILQ personnel (Ethan), validating the integrity of the remaining units against the client's mandated visual and dimensional acceptance criteria. Units that passed the inspection were deemed compliant with specification and fit for commercial use.

No action required.

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Review of training system performance

Topic Minutes/Notes

Team reviewed status of the training system. All 2025 required employee training was completed
One new hire in 2026, Haley Shomo. Training to be completed by 05/01/2026
QSR Training for all employees will take place in June, 2026
Appropriate Silq Employees will be retrained on all design control policies (QM.SLQ004-QM.SLQ010) by 01 Jul 2026 per CAPA 2025-003

Action Item: Establish dynamic employee training program to more thoroughly asses comprehension of existing quality procedures and revisions

Action Items

1. Action Item: Establish dynamic employee training program to more thoroughly asses comprehension of existing quality procedures and revisions

Assigned to: Ethan Rao

DOCUMENT TITLE:
Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Review of Post Market Surveillance / Customer Feedback

Topic Minutes/Notes

Team reviewed post-market surveillance data for 2025.

A) Post-market clinical trials

- Study STC-001 Analysis report on the primary endpoint of the RCT Study (analysis of biofilm) was submitted by Technomics. Results were favorable indicating the ClearTract catheter had significantly less biofilm than the BARDEX and Rusch Gold Standard catheters.

- Study STC-002 will be closed 03/18/2026.

Action Item: Compile Close Out Letters by 01 Apr 2026

B) The evaluation of the MAUDE database:

Database search from Jan 1, 2025 to Dec 31, 2025 for reports in the following Product Classes.

Catheter, Urological:

1,402 Reports: 1,285 malfunctions, 117 patient injuries, 0 deaths

Catheter, Urological (Antimicrobial) and Accessories

3,780 reports: 3,710 malfunctions, 70 patient injuries, 0 deaths

Catheter, Suprapubic and Accessories

1 Report

"A suspected 'small part of the peel-back sheath component' of the device was found to have been retained in the patient's bladder."

C) There was 1 product complaint in 2025 involving two devices.

Reviewed in the Review of Product Complaints section of MR.

D) 6 Patient/Physician Testimonials Received. All Facilities who purchased product in 2024 placed additional orders in 2025.

E) There have been no product returns, field safety corrective action/recalls, or public health advisories of safety notices from regulatory authorities.

F) There were two NCRs initiated in 2025.

Reviewed in Review of Production Data section of MR

G) There have been two device-related CAPA's.

Reviewed in Review of CAPA system section of MR

H) Process validations:

-Shelf-life extension for Suspension (C.SLQ001)

Study performed in accordance with Protocol #VV.SLQ028

Catheter samples coated with 2 year real-time aged Suspension C.SLQ001 (Lot #HXY-825021)

Coating adherence verification and crystal violet absorbance test were performed on coated samples. Results met acceptance criteria confirming a shelf life of 2 years for Suspension. Report #VV.029.

-TR-SLQ-0015: Real Time Aging (T=12 Months) Completed for all sizes and volumes including and between 8 Fr / 3-5 mL to 24 Fr / 30 mL 2-Way ClearTract Catheters. Validates 3-year shelf-life labeling.

-ECO-002217: SteriPax pouch passed design verification, stability testing and process validation and is approved for use.

J) Supplier issues: No supplier issues or SCARs reported for 2025.

K) No issues with training to report.

Topic: Review of reportings to regulatory authorities

Topic Minutes/Notes

Team reviewed the two reportings to regulatory authorities in 2025.

Report Number: 3014650073-2025-00002. Date of Event: March, 29 2023
Event detailed in PCF 2023001, 483 Observation 1, CAPA 2025-002

Report Number: 3014650073-2025-00001. Date of Event: Dec 05, 2023
Event detailed in PCF 2023004, 483 Observation 1, CAPA 2025-002

No action required.

Topic: Review of statistical techniques (sampling plans) used to evaluate the quality of components, materials and finished goods to assure continued applicability

Topic Minutes/Notes

Team reviewed statistical techniques (documented in QM.SLQ011 Rev. A) and agreed they are suitable and adequate for Design V&V and for process qualifications and validation.
The statistical techniques for production sampling plans are suitable and adequate.
No action required.

Topic: Review of supplier performance

Topic Minutes/Notes

Team reviewed supplier performance. There were no changes to supplier approval statuses.

Category I suppliers

Pathway (Approved): 7 POs issued to Pathway in 2025. Latest re-evaluation completed 7 Aug 2025.

No change to their approval status. Recommend Supplier Audit in Q3 2026

Richman Chemical (Approved): NO PO's were issued to Richman Chemical in 2025. Supplier re-evaluation postponed. No change to their approval status.

TCI (Approved): NO PO's were issued to TCI in 2025. No change to their approval status.

Steripax (Approved): NO PO's were issued to Steripax in 2025. Supplier re-evaluation was performed using the initial self-assessment survey. No change to their approval status.

Category III suppliers

Fisher Scientific (Approved): No PO's were issued to Fisher Scientific in 2025. Supplier re-evaluation was performed using the initial supplier assessment score. No change to their approval status.

Independent Air Group (Approved): No PO's were issued to Independent Air Group in 2025. Supplier re-evaluation was performed using the initial supplier assessment score. No change to their approval status.

McMaster-Carr (Approved): No PO's were issued to McMaster-Carr in 2025. Supplier re-evaluation was performed using the initial supplier assessment score. No change to their approval status.

Micro Precision Calibration (Approved): 1 PO was issued to MPC during the evaluation period. Supplier re-evaluation was performed. Scored 100/100. No change to their approval status.

Repligen (Approved): No PO's was issued to Repligen in 2025. Supplier re-evaluation was performed using their 2024 supplier assessment score. No change to their approval status.

Category III suppliers (cont.)

VWR (Approved): No PO's were issued to VWR in 2025. Supplier re-evaluation was performed using the initial supplier assessment score. No change to their approval status.

FireflySci Inc. (Approved): 1 PO was issued to FireflySci Inc. in 2025. Supplier re-evaluation was performed. Scored 100/100. No change to their approval status.

FGL (Approved): 1 PO was issued to FGL. In 2025. Supplier re-evaluation was performed. Scored 100/100. No change to their approval status.

Category IV suppliers

Uline (Approved): One PO was issued to Uline during the evaluation period. Supplier re-evaluation was performed. Scored 100/100. No change to their approval status.

United States Plastic Corp. (Approved): No PO's was issued to United States Plastic Corp. in 2025. Supplier re-evaluation was performed using their 2024 supplier assessment score. No change to their approval status.

Cole Parmer (Approved): No PO's was issued to Cole Parmer in 2025. Supplier re-evaluation was performed using their 2024 supplier assessment score. No change to their approval status.

Glacier Tanks (Approved): No PO's was issued to Cole Parmer in 2025. Supplier re-evaluation was performed using their 2024 supplier assessment score. No change to their approval status.

Topic: Changes that could affect the quality management system

Topic Minutes/Notes

Team reviewed the changes to the following regulatory standards.

The Quality Management System Regulation (QMSR) effective on February 2, 2026 amends the device current good manufacturing practice (CGMP) requirements of 21 CFR Part 820, incorporating ISO guidelines for medical device manufacturing. This action harmonizes the FDA's CGMP regulatory framework with that used by other regulatory authorities.

2025 Silq Internal Audit: "Auditor found SILQ to be in compliance with the requirements delineated within ISO 13485:2016". Internal review, however, has identified a number of gaps that will be described in upcoming Silq QMSR Gap Analysis Report including a greater emphasis on risk analysis and documentation of Management Review Meeting Action Item assignments and executions

2026 Q2 Silq Quality Plan and QMSR Gap Analysis Report will be distributed to management team by 01 Apr 2026

Due to limitations of current FileHold QMS System, Silq will begin transition from FileHold to an Internal Server QMS. 2026 Silq QMS Transition Plan will be distributed to management team by 31 Mar 2026

Action Items

Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: New or revised regulatory requirements

Topic Minutes/Notes

The team reviewed the following changes to regulatory standards:
ISO 15223-1:2021 published Amendment 1: 2025 (Medical devices — Symbols to be used with information to be supplied by the manufacturer, Part 1: General requirements)
Addition of symbol for UDI (Unique Device Identifier)
Product labels for pouch and box of Silq product (SLQ-LB-4000, SLQ-LB-4002, SLQ-LB-4008, SLQ-LB-4009) contain UDI. No action required.

ASTM F623-25 replaces ASTM F623-19 (Standard Performance Specification for Foley Catheter) Standard now states it does not comprehensively cover biocompatibility of Foley catheters with surface treatments or that are used in suprapubic insertions.
Action Item: Evaluate and update risk management policies to align with ISO 10993-1:2018 and ISO 14971

ASTM F1886/F1886M-25 replaces ASTM F1886/F1886M-16 (Standard Test Method for Determining Integrity of Seals for Flexible Packaging by Visual Inspection)
Added section for visual inspection of packaging material surfaces for defects that could compromise integrity.
Action Item: Perform inspection of existing finished goods

No updates to ASTM D4169-23e1, ASTM D4332-22, ISO 11607-1:2019/Amd1:2023, ISO 11607-2:2019/Amd1:2023, ASTM F1980-21, ASTM F88/F88M-23, ASTM F2096-11(2019)

Action Items

1. Action Item: Evaluate and update risk management policies based on ASTM F623-19 to align with ASTM F623-25 and ISO 10993-1:2018 and ISO 14971

Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Review of Risk Management Activities

Topic Minutes/Notes

Risk Management File, Production & Post-Production Review Approved 16 Apr 2025 did not identify any new hazards.

Following up on 2024 MR Action Item, a 2025 MR Action item is recommended to evaluate if existing failure modes accurately reflect all observed PCF root causes and to again evaluate if existing probability ratings should increase based on complaints seen in the field

Existing hazard #10.1 regarding three failure modes:

Balloon deflates or does not inflate – Valve malfunction or leaks (wall thickness issue)

Balloon does not inflate – valve malfunctions

Catheter component breaks under normal tensile stresses – Material or dimensional issues

The probability of each failure mode is currently set at '1'.

Recommended Action Item: Review QM.SLQ012, QM.SLQ013, RM-0018, RM-0019, RM-0020, RM-0021, RM-0094, and RM-0141 and identify regulatory gaps and ensure compliance with ISO 10993-1:2018 and ISO 14971

DOCUMENT TITLE:
Management Review Meeting Minutes

Revision:
A

DOCUMENT #:
FM1-QM.SLQ018

Effective Date:
25Sep2020

Topic: Review of Design Control Activities

Topic Minutes/Notes

Shelf-life extension for Suspension (C.SLQ001)
Study performed in accordance with Protocol #VV.SLQ028
Catheter samples coated with 2 year real-time aged Suspension C.SLQ001 (Lot #HXY-825021)
Coating adherence verification and crystal violet absorbance test were performed on coated samples. Results met acceptance criteria confirming a shelf life of 2 years for Suspension. Report #VV.029.

TR-SLQ-0015: Real Time Aging (T=12 Months) Completed for all sizes and volumes including and between 8 Fr / 3-5 mL to 24 Fr / 30 mL 2-Way ClearTract Catheters. Validates 3-year shelf-life labeling.

ECO-002217: SteriPax pouch passed design verification, stability testing and process validation and is approved for use.

CAPA 2025-003: Initiated 20 Oct 2025 in process

Action Items

1. Action Item: Complete correction action process in CAPA 2025-003

Assigned to: Ethan Rao

☐ Simple Action

Topic: Review of Resources

Topic Minutes/Notes

Silq: One new hire added in 2025 (Stephen Page).

Recommended Resource Additions:

- Conduct Employee Training for Na He to add 'Quality Specialist' to her existing role
- Purchase AAMI/ISO 13485:2016; Medical Devices: A Practical Guide (PDF) and various other regulatory standard documents (~\$500)

Manufacturing Infrastructure & Environmental Controls

Pathway: Manufacturer of surface treated catheters, labeling, final packaging, sterilization and distribution. No recommended resource additions

1. Action Item: Conduct Employee Training for Na He to add 'Quality Specialist' to her existing role	
Assigned to: Ethan Rao	☐ CAPA Required ☒ Opportunity for Improvement ☐ Simple Action
2. Action Item: Approve purchase of AAMI/ISO 13485:2016; Medical Devices: A Practical Guide (PDF) and various other regulatory standard documents (~\$500)	
Assigned to: Verne Sharma	☐ CAPA Required ☐ Opportunity for Improvement ☒ Simple Action

Topic: Additional Opportunities for Improvement	
Topic Minutes/Notes	
Team reviewed the following items:	
Postponed Action item: Complete Gage R&R study on the following in-process quality control test methods: UV Light Absorbance (TM-HDX-001) and Rinse Test (TM-HDX-002). To be completed upon next production of C.SLQ001	
Postponed Action item: Complete test method validation for 1H and 19F NMR spectra readings. To be completed upon next receipt of M.SLQ001	
Recommended Action Item: Develop Test Protocol for Analysis of UV Spectroscopy of Incoming and Finished Catheters.

	DOCUMENT TITLE: Management Review Meeting Minutes	Revision: A
	DOCUMENT #: FM1-QM.SLQ018	Effective Date: 25Sep2020

Meeting Date / Time: 16 Mar 2026 9:00AM PT

Timeframe under review: 01 Jan 2025 to 31 Dec 2025

Conclusions: (check the appropriate conclusion based on group consensus)

- ☐ The quality system has been determined effective, suitable and adequate without changes required at this time
- ☒ The quality system has been determined effective, suitable and adequate. However, actions are required to maintain the system.
- ☐ The quality system has been determined effective, suitable and adequate with opportunities for improvement identified at this meeting
- ☐ The quality system has significant deficiencies and is currently either not effective, not suitable or not adequate. Immediate corrective actions are required.

Changes: (check the appropriate conclusion based on group consensus)

- ☐ Proposed changes made to the Quality System are not substantive.
- ☒ Proposed changes made to the Quality System are substantive.
- ☐ There are no proposed changes to the Quality System at this time.

Approximate Next Meeting Date: January, 2027
