Category II Supplier Assessment Form

Complete the following information for the consultant or contractor in question:

Consultant or Contractor Name:	Bryan Wong
Title:	Director, Quality Assurance
Company (if applicable):	Biologics & Medical Device Consulting Group
Area of Service to be Provided:	☒ Quality Assurance ☒ Regulatory ☒ Manufacturing Operations ☐ Design and Development (R&D / Engineering) ☐ Software ☐ Clinical / Medical ☐ Marketing ☐ Other:
Specific Services to be provided:	Support design control, manufacturing and QMS in QA/RA role
Curriculum vitae (CV) or Resume Attached?	☒ Yes ☐ No
The CV / resume has been reviewed and the contractor/consultant approved for the specific services to be provided:	☒ Approved ☐ Conditional ☐ Rejected / Disqualified
Comments/Additional Information:	
Approved By: (Name/Title/Date)	 CEO 12 July 2022

⌘ EXECUTIVE SUMMARY ⌘

Engineering professional with over 20 years of experience in the regulated medical device industry contributing to the implementation and improvement of quality management systems, management leadership, employee development, and effective implementation of design controls in product development. I am a well-diversified, organized, and team-focused quality professional with a strong background in 21 CFR Part 820, ISO 13485, MDD/MDR, and ISO 14971.

⌘ EMPLOYMENT HISTORY ⌘**BIOLOGICS & MEDICAL DEVICE CONSULTING GROUP****SR. REGULATORY / QUALITY ASSURANCE ENGINEER****9/18 - PRESENT**

Member of a small, highly experienced regulatory and clinical services consulting group (<20 employees). The group serves multiple medical device, in vitro diagnostic, pharmaceutical, and early stage biologics companies by providing quality, regulatory, and clinical consulting.

Specific responsibilities include:

- Development, implementation and maintenance of quality management systems compliant to ISO 13485, 21 CFR 820, MDD 93/42/ECC, and MDR 2017/745
- Regulatory strategy development
- Implementation of design control activities to support build of design history files, technical files, and design dossiers for 510(k), IDE submissions, de novo requests, and CE Mark approvals
- Perform audits of client quality systems to meet ISO 13485, 21 CFR Part 820, MDD, and MDR requirements as lead auditor
- Develop product labeling in accordance with applicable regulatory requirements

SELF-EMPLOYED**3/17 – 9/18****SR. REGULATORY / QUALITY ASSURANCE ENGINEER**

- Provide quality and regulatory services and strategies for Class II medical device
- Assist in 510(k) strategy and preparation
- Update labeling in accordance with product design changes and applicable regulatory requirements
- Developed and executed human factors engineering usability study

OPTISCAN BIOMEDICAL CORP**7/07 – 3/17**

Start-up company that develops continuous blood analyte monitoring system for the ICU/CCU. Product is Class II medical device. Progressively advanced my role and responsibilities in the small start-up while promoting compliance to internal QMS and applicable regulations.

MANAGER, QUALITY ASSURANCE ENGINEERING**8/15– 3/17**

- Managed V&V effort for product development process which included development of V&V Master Plan, product and software requirements specifications, traceability matrix, test plans,

and test reports.

- Responsible for labeling including product labels, IFU, translations, and marketing material.
- Assist in preparation of regulatory submissions. Obtained CE Mark from notified bodies (NSAI and BSI). Obtained 510(k) clearance from FDA for glucose monitoring device.
- Responsible for maintaining Technical File and Design History File.
- Responsible for Document Control. Facilitate change control board in timely processing of change orders.
- Supervisory role to document control specialist and quality engineer

QUALITY ENGINEER

7/07 – 8/15

- Developed, revised and implemented Quality Management System. Obtained and maintained ISO 13485:2003/2012 certification from Notified Bodies (NSAI and BSI).
- Served as liaison with Notified Bodies, FDA, and other regulatory agencies for on-site audits/inspections as requested.
- Responsible for company-wide training of QMS and maintenance of employee training records.
- Coordinate cross-functional teams providing quality/regulatory support and strategies in Design Control activities ensuring compliance to ISO 13485, 21 CFR Part 820, ISO 14971 and IEC 62304. Conducted phase gate Design Reviews and Design Transfer to production. Reviewed and approved all protocols and reports involving design control activities.
- Conducted risk management activities per ISO 14971 including development of internal procedures, risk management plan, hazards risk analysis, design and process FMEA, and generated final Risk Management Report.
- Approved Master Validation Plan and all process validation (IQ/OQ/PQ) plans, protocols and reports. Ensured all manufacturing processes, equipment and facilities are validated.
- Responsible for incoming inspection, in-process inspection and finished product testing and release. Supervisory role to two incoming quality control inspectors.
- Developed and implemented incoming inspection process and sampling plan techniques using risk assessment. Reduced inspection activities by implementing dock to stock program and switching rules based on supplier performance and risk assessment of critical components.
- Performed Gauge R&R studies to support qualification of inspection test methods and fixtures.
- Developed and implemented the nonconforming material reporting process.
- Conducted weekly MRB meetings to review and disposition nonconforming material.
- Conducted and reviewed root cause failure investigations and proposed corrective actions using DMAIC tools with regard to product and manufacturing process issues.
- Ensured completion and timely closure of CAPA and NCMR; monitored effectiveness of corrective actions.
- Established and monitored quality metrics, such as non-conforming material, CAPA, change order processing time and SPC run charts, and reported performance in management reviews.
- Responsible for supplier approval, evaluating and monitoring supplier performance as QA representative of the supplier quality group.
- Conducted internal audits and external supplier audits per ISO 13485 requirements and generated audit reports.

- Developed and executed shelf life protocols (accelerated aged and real-time aged product) for disposable cartridge and disposable accessories.
- Developed and executed packaging integrity testing for disposable cartridge in accordance with ISO/ISTA/ASTM standards.
- QA representative of defect review board which reviews product defects and approves corrective action implementation.
- Supported clinical trials in Erasme Hospital, Brussels: Performed daily quality control calibration of analyzers; performed paired glucose and lactate measurements using analyzers; and performed quality control review of clinical data.

INSTRUMENTS FOR SCIENCE & MEDICINE, INC.

11/00 – 11/06

R&D, QUALITY ASSURANCE AND REGULATORY ENGINEER

Consulting company that offers contract medical device product development and regulatory services. Assisted in hardware design and prototyping. Wrote verification and validation test procedures to ensure complete verification of product specifications have been met. Performed quality assurance testing and compliance duties to satisfy IEC 60601-1 and FDA requirements for medical devices, and for CE marking and UL listing. Contributed in many aspects of the product development lifecycle: worked on defining product requirements and specifications, created and maintained product configuration documentation, worked on embedded systems, industrial design, software and firmware programming, and system integration. Maintained and helped define company quality management system. Administered company IT network

Projects included:

CRANIAL ELECTROTHERAPY STIMULATOR

PROJECT LEAD: In charge of timely, efficient product development into clinical trials for Class III device. Motivated employees to meet client's project schedule on time. Resulted in high quality product which had no problems receiving CSA certification approval through CSA International.

- Managed cross-company departments to ensure timely design, implementation and testing.
- Responsible for document control and QA duties.
- Authored and performed verification and validation procedures.
- Participated in risk analysis and product specification reviews.
- Maintained product configuration documents.
- Assisted VP of Regulatory in submission of 510(k) and response to FDA.
- Device received CE and CSA approval marks and was cleared for market by FDA.

STRESS URINARY INCONTINENCE (SUI) RF GENERATOR

PROJECT ENGINEER: Responsibilities included research and development of peristaltic pump control and quality assurance activities. Also played a major role in product documentation and maintaining project schedule for product development which enabled our client to obtain CE mark in timely fashion.

- Wrote and performed verification and validation procedures for the Class III device.
- Participated in risk analysis and product specifications reviews.
- Wrote firmware that controls a stepper motor, used as a peristaltic pump.
- Designed and prototyped dynamic load fixture; used as test bed fixture.

- Device received CE mark and was cleared for market by FDA.

EEG MONITOR

PROJECT ENGINEER: Performed quality assurance functions and assisted in product documentation.

- Performed quality assurance functions and assisted in product documentation.
