	DOCUMENT #: FM3-QM.SLQ015	Effective Date: 25Sep2020

Category II Supplier Assessment Form

Complete the following information for the consultant or contractor in question:

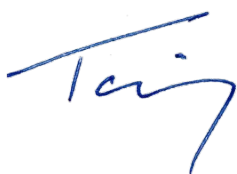

Consultant or Contractor Name:	Octavio Cruz-Uribe
Title:	V.P., Quality Assurance
Company (if applicable):	Biologics & Medical Device Consulting Group
Area of Service to be Provided:	☒ Quality Assurance ☒ Regulatory ☒ Manufacturing Operations ☐ Design and Development (R&D / Engineering) ☐ Software ☐ Clinical / Medical ☐ Marketing ☐ Other:
Specific Services to be provided:	Support design control, manufacturing, and QMS implementation and maintenance in QA management role
Curriculum vitae (CV) or Resume Attached?	☒ Yes ☐ No
The CV / resume has been reviewed and the contractor/consultant approved for the specific services to be provided:	☒ Approved ☐ Conditional ☐ Rejected / Disqualified
Comments/Additional Information:	
Approved By: (Name/Title/Date)	 CEO 07 July 2022

OCTAVIO (TAVI) CRUZ-URIBE, PhD

◆ EXECUTIVE SUMMARY ◆

20+ of R&D, manufacturing, operations, regulatory, quality, and clinical experience in both the medical device and pharmaceutical industries, as well as in academic settings.

- ❖ **QUALITY ASSURANCE:** Written and implemented complete 21 CFR 820 compliant quality systems; facilitation of ISO 13485 certification (EU, Canada) for new companies; developed robust, flexible design control programs for startup companies; developed and implemented ISO 14971 compliant risk management processes; supported and managed client audits by FDA and notified bodies; executed comprehensive process validations (IQ, OQ, PQ, PPQ) for facilities, equipment, and processes.
- ❖ **REGULATORY & CLINICAL AFFAIRS:** Prepared and supported the submissions of PMA's, 510k's, IDE's, IND's (biologic products), MAF's, IRB applications, and FDA export permits; prepared technical files and design dossiers and obtained CE marks for new products; prepared and submitted pre-clinical and clinical applications with the Mexican ministry of health; managed the clinical group for a class III device/drug combination product company, provided oversight and supervision of all clinical and pre-clinical protocols and documentation; managed pre-clinical testing for long-term class III implants; provided expertise in bench, sterilization, packaging, and biocompatibility testing for regulatory submissions.
- ❖ **OPERATIONS:** Managed GMP manufacturing facilities of a Class III device/drug combination product company; provided management and oversight of ISO class 5, 6, and 7 cleanrooms, equipment PM/calibration programs, purchasing, receiving, supplier management, general administration, facility pure water and medical gas utilities; Established and managed production lines of class III devices and a small biomedical MEMs manufacturing production center; developed sterilization cycles and packaging configurations for multiple company products; held responsibility for the resource management and training of quality, R&D, manufacturing, and administrative personnel.
- ❖ **ENGINEERING:** 5 years as research assistant in a biochemical engineering lab; managed engineering research lab for 4 years; lectured on multiple chemical engineering topics to undergraduate students; 2 peer reviewed publications and published book chapter.

April 21, 2022

OCTAVIO (TAVI) CRUZ-URIBE, PhD

◆ EMPLOYMENT HISTORY ◆

BIOLOGICS AND MEDICAL DEVICE CONSULTING GROUP (PREVIOUSLY MEDTECH CONSULTANTS)
SENIOR PRODUCT DEVELOPMENT AND OPERATIONS SPECIALIST Aug 2010 to Present

Member of a small highly experienced regulatory and clinical services consulting group (13 employees). The group serves multiple medical device, pharmaceutical, and early stage biologics companies by providing regulatory, quality and clinical consulting. Client companies in burn wounds, cardiology, cardiovascular, electrophysiology, in vitro diagnostics, ophthalmology, orthopedic, neurology, neurovascular, ALS, diabetes monitoring, plasma filtration, tumor detection, general surgery and radiation devices. Specific accomplishments include:

- ❖ Successfully prepared and submitted IDE, 510(k) and PMA submissions for burn wound treatments, cardiac ablation systems, cardiac mapping systems, continuous glucose monitoring systems (capital equipment and disposable blood draw kits), electrical stimulation devices, cardiac injection catheters, disposable continuous wound catheter kits, in vitro diagnostic kits, neuro-thrombectomy devices, neuro vascular aspiration devices, retinal monitoring systems, software driven devices, DVT prevention devices, total artificial hearts, and temporary implants.
- ❖ Supported IND submissions for stem cell derived patch products for the treatment of age-related macular degeneration (AMD) and for other gene therapy products
- ❖ Supported a successful FDA EUA submission for a plasma filtration column to provide cytokine and toxin reduction to treat COVID-19 patients in the ICU.
- ❖ Assisted in FDA Break Through submissions for novel plasma filtration columns and tumor cell detection device.
- ❖ Developed and implemented remediation action plans for response to US regulatory agency action.
- ❖ Successfully prepared and submitted technical files and design dossiers for CE mark approval.
- ❖ Successfully coached and managed clients for pivotal face-to-face regulatory audits
- ❖ Performed on-site and remote internal audits of client quality systems to meet ISO 13485, Canadian MDR SOR/98/282, and 21 CFR 820 compliance
- ❖ Installed, educated, and implemented flexible design control and risk management programs for small start-up companies
- ❖ Developed clinical literature reviews for cardiac mapping system
- ❖ Developed product labeling and user information for multiple product lines
- ❖ Developed human factor testing protocol for patient record archive software system and electro-muscular stimulation systems

OCTAVIO (TAVI) CRUZ-URIBE, PhD

CALIFORNIA MEMSTEK CHIEF OPERATING OFFICER

Sept 2014 to July 2016

- ❖ Chief executive for a small medical device R&D and manufacturing company specializing in long term implants and biologic/device combination products.
- ❖ Directed long term operational objectives and managed daily operations of a 5,000+ sqft cleanroom manufacturing facility, with R&D and testing laboratories.
- ❖ Developed flexible resourcing structure to provide support for multiple R&D and manufacturing client projects that included pancreatic cell immobilization technology, long term drug delivery devices, ultrathin membrane scaffolds for retinal cells, novel accommodating intraocular lens technology, and micro drug pump devices.
- ❖ Maintained an onsite unique biomedical MEMs foundry center to support commercial development efforts with the California Institute of Technology (CalTech) and Alcon/Novartis
- ❖ Prepared and submitted device master files to the FDA for client products used in IND submissions
- ❖ Negotiated and completed client terms for R&D and manufacturing contracts
- ❖ Established company as the implant device manufacturer for a \$16M CIRM grant project
- ❖ Provided continuous manufacturing of clinical products to support multiple investigational studies
- ❖ Oversaw the implementation of a comprehensive quality management system for the company

REPLENISH, INC. AND MINIPUMPS LLC DIRECTOR OF QA / RA / CA

Dec 2011 to August 2014

- ❖ Director of Quality Assurance for a group of companies developing and manufacturing:
 - Class III ocular active implant
 - Intraocular lens
 - External drug delivery device
 - Disposable retinal surgical system
 - Disposable drug refill kits
 - Stem cell membranes
- ❖ Held responsibilities for quality assurance, quality control, clinical affairs, regulatory affairs, and manufacturing/facility infrastructure.
- ❖ Managed regulatory submissions to the FDA and inspections by the California Food and drug Branch.
- ❖ Maintained the Quality Management System for a GMP facility with ISO Class 5/6/ and 7 cleanrooms.
- ❖ Managed the purchasing/receiving department, inventory management system, supplier quality assurance system, and calibration/PM system for GMP manufacturing facility.

OCTAVIO (TAVI) CRUZ-URIBE, PhD

- ❖ Managed all pre-clinical animal testing for long-term implants.
- ❖ Developed design verification and validation programs
- ❖ Developed sterilization cycles and packaging configurations for all company products
- ❖ Established the design control program and risk management program for the company and all products

REGLERA LLC, (NOW DOHMEN LIFE SCIENCES)

QUALITY MANAGER/PROJECT MANAGER

Dec 2007 to July 2011

- ❖ Provided project management for the implementation of design control and quality systems for Class I, II, III devices, and tissue products for over 20+ clients. Client product types include:
 - Catheters (angioplasty, ablation, wound infiltration)
 - Computer surgical guidance systems
 - Surgical tools
 - Orthopedic implants
 - Neural stimulators
 - Implantable infusion pumps
 - Ophthalmic cameras
 - Electrosurgical tools
 - Drug nebulizers
 - Drug delivery applicators, Blood draw tubing sets
 - Laser ablation catheters
 - Processed skin, bone, and cornea tissue products
- ❖ Interim Quality Assurance Director for client start-up company
- ❖ Obtained ISO certification (EU, Canada) and CE mark approval for new company/products
- ❖ Manage regulatory inspections for compliance with FDA QSR, ISO 13485, MDD 93/42/EEC, SOR/92-282
- ❖ Pre-Market FDA submission support (510(k), PMA, IDE) for multiple client products
- ❖ Developed and implemented the following design control activities:
 - Design Control Program (complete SOP suite)
 - Design Planning, Inputs, Outputs, Validation, and Transfer deliverables
 - Design Review
 - Risk Management
 - DHF development
 - Software Life Cycle development
 - Design Verification/Validation: Performance, Sterilization, Packaging, Shelf-life, Software qualification
- ❖ Implemented and supported the following quality system activities:

OCTAVIO (TAVI) CRUZ-URIBE, PhD

- Supplier Quality Assurance
- Internal Audits (FDA QSR, ISO 13485, CMDCAS)
- Corrective and Preventive Actions
- Management Reviews
- Non-conforming materials
- Document Control
- Process Validation: Test method validation, IQ, OQ, PPQ, MVP
- Cleanroom validation and environmental monitoring
- Product Labeling and Packaging
- Employee Training Program

INDEPENDENT CONSULTANT

QUALITY/VALIDATION SPECIALIST

2004 to 2007

- ❖ Quality system development and support for medical device companies
- ❖ SOP and manufacturing work instruction development for small processing lines
- ❖ Validation test protocol development for process and sterilization validations
- ❖ Test result data analysis and final report development for design V/V

DEPT. OF CHEMICAL ENGINEERING, OREGON STATE UNIVERSITY, CORVALLIS

RESEARCH ASSISTANT

2002 to 2007

- ❖ Lectured on FDA regulations and Quality System Compliance for Biomedical Engineering Department
- ❖ Lectured on mass transfer, materials/energy balances, and introductory chemical engineering principles
- ❖ Developed methods and processes for the continuous biological transformation of organic compounds
- ❖ Established novel testing plans and experimental procedures for federal government funded research studies
- ❖ Developed technical manuscripts for scientific journal publications and book chapters
- ❖ Supervised and trained laboratory personnel for both research and education positions

VTs CONSULTANTS

VALIDATION & COMPLIANCE/PROJECT ENGINEER

2000 to 2002

- ❖ Team lead for validation engineers and specialists
- ❖ Provided testing and documentation for the manufacturing sector of pharmaceutical companies to maintain cGMP compliance
- ❖ FDA audit support for cGMP manufacturing facility audits

OCTAVIO (TAVI) CRUZ-URIBE, PhD

- ❖ Developed and executed installation, operation, and performance qualifications for a variety of utility, filling, manufacturing, packaging, waste recovery systems, and USP/WFI water systems
- ❖ Executed sterilization and cleaning validations

◆ EDUCATION ◆

Ph.D.	Chemical Engineering	Oregon State University 2007
B.S.	Chemical Engineering	University of Colorado 1999
